ABOUT ME

I am an interactive media design student who helps the planning, execution and development of digital products through design, guaranteeing high levels of innovation in the market through UX Research, User Interface Design (UI) and Front-End Development.

Currently in my professional development, I have developed leadership skills, project management, effective communication, group work and entrepreneurship. All this in conjuction with the interactive design specialization, has facilitated my ability to lead completely and be part of innovation projects in real companies.
